

## Cray 4 Kids Connects Our Youth to Tech!

C4K is a 501(c)(3) STEM-focused organization, that provides our youth with an opportunity to learn in unconventional ways, while also embracing the role technology will play in their future.

### Our Mission

In an effort to foster a generation of STEM innovators and close the economic gap in underrepresented communities, C4K provides access to STEM education through After School programs. Programs will include ongoing support through mentoring and leadership development.

**"Currently there are disparities in access to quality STEM programs. We are helping close the gap with STEM learning opportunities by providing underrepresented youth an equal opportunity to learn through innovative programs and STEM activities"**

In 2021, C4K was established to empower our youth with opportunities to learn in unconventional ways. C4K's mission provides underrepresented youth an equal opportunity to learn through innovative programs and STEM activities by utilizing technology that will equip them with the mindset to thrive in their future endeavors.

A growing gap exists between the amount of quality STEM educational resources available to our underrepresented youth. To help bridge this gap, C4K's objective is to create STEM-focused programs which will provide access to emerging technology and promote experiences that prioritize hands-on learning to increase student engagement, interest, and achievement in the STEM fields. C4K will work with key stakeholders and create partnerships to help youth foster their self-identification as innovators and changemakers.

C4K strives to provide an innovative way to educate our youth with STEM learning opportunities and encourage them to be successful in the future.

Our work is dependent on grants, donations and sponsorships, which allow us to support the development of key STEM competencies. With matching gifts, it's possible to double or even triple your donation. Many employers sponsor matching gifts programs and will match charitable contributions made by their employees.

With your support, we're able to unlock the potential of young people to change their lives and the world.
